1974 BMW 2002

*****IF YOU ARE SEEING THIS IT'S AVAILABLE-NO NEED TO ASK*****

Needs finishing. Windows are out so headliner can be redone. No front windshield. Have rear, sides and door glass is installed and working properly.

Running and driving car. Will need finishing work to be done for daily travels.

Engine is not #'s match and has an e12 head with piano top pistons which are higher compression than typical stock. Intake is a Cannon ported and hogged out to match the Weber 38/38 carburetor. Distributor is a mechanical advance Tii 002 unit running points. Ignition is backed up by an MSD AL6 unit and MSD blaster coil.

Transmission is a 4 speed with new seals and mount. Drive shaft is special rebuild using a slip spline and serviceable Spicer U-joints. It connects-up with a standard rear differential. CV Axles are clean and with no cracked boots.

Suspension has new lowered springs and runs Bilstein shock/struts. New perch pads installed onto inspected, cleaned and refurbished chassis components. Both front and rear subframes removed and disassembled before returning to the car. Entire front end has new links, joints, and tie rods etc... Rota wheels with Bridgestone Pontenza 195/50r/15" tires.

Brakes are redone using new rear wheel cylinders, SS braided lines, and P-brakes cables. Fronts are brand new "big" brake set up with new bearings, SS braided lines, hubs, wheel studs, vented rotors and larger 4 piston calipers running Mintex pads.

Interior has new carpet and Recaro Sport seats. Door cards are uncut with no holes. Back seat has an area that is ripped only on the top side of the upright. AC center console (NO AC) is leather wrapped and uses 3 gauges-which need to be hooked up. The shift console has a leather wrapped knob with BMW roundel. Have seat belt mechanisms un-installed at time of pictures. May get to that if not they are included. Headliner will need to be replaced.

Body has a new stainless euro front bumper. Paintwork could be improved upon with some touch up repairs, but the front fenders are brand new and will need to be painted to match. There are also trim holes which are sanded for welding that would need attention. Basically the whole car should be painted if you want nice. Otherwise touch it up and drive it. This entire car is a mild project that if you have a couple weekends can be safely on the road enjoying this car. It needs finishing and sorting. Nothing beyond the average at-home mechanic can't handle. Paintwork is fair and has scratches plus chips. H4 city light headlights and front ABS plastic airdamn.

See pictures and decide for yourself if this is right for you. There is more and I have a few extra items included just not worth covering it all in this post.

SOLD AS-IS NO WARRANTY or RETURNS. DEPOSITS are NON-REFUNDABLE

Registration is current and in my name, located in Sacramento, CA.

*****Leave your number to discuss further and note I will only call once. If you do not leave a contact number, 1) It will be obvious you did not understand what you were supposed to read, and 2) if you just ask silly questions like how little will I take or is it still available you will be ignored. *****

do NOT contact me with unsolicited services or offers
