1976 BMW 2002 Series

Fantastic condition... purrs like a kitten. This car was originally purchased in Germany and imported to the Bay area as a daily driver. It was stored when the owner moved to the Seattle area in early 1990s. It was my daily driver for a few years, but has been a weekend / summer car since 2004. Solid car, could easily be a daily driver again. Perfect car for amateur mechanic or someone who wants a few easy restoration projects.

Clean paint, and rust-free. Original BMW factory glass, with rear defrost. Original interior. Front seats and carpet in excellent condition, seats currently covered in customized sheepskin covers. Sunroof seal is tight, but opens sticky for lack of use. Rare automatic transmission. Odometer reads 136k but has frozen and I'd estimate 150k pretty accurate. All original dash, including push button radio. Re-tagged this past July for next two years.

Newer: brakes, radiator, thermostat, weber carburetor, fuel pump, spark plugs, battery with disconnect and some hoses.

Mechanical items that could use attention: shocks, turn signal relay and heater blower

Restoration items that could use attention: rear bench upholstery, headliner and cracked rear break cover.
