

LEAD-ACID BATTERY MANUFACTURERS AND BRAND NAMES LIST 2014

Bill Darden

Last Updated on November 15, 2014

Lead-acid battery manufacturers, distributors, large chain/auto parts stores, or major dealers will often *private label* their batteries, for example in the North America, *EverStart* for [Walmart](#) and *DieHard* for [Sears](#) and [Kmart](#). These stores might have these private labeled batteries made by several manufacturers depending on the location to reduce shipping costs or to provide different types or sizes of batteries and contracts with manufacturers might change. Below is an alphabetical list of some of the hundreds of global battery manufacturers, joint ventures, distributors, and major dealers with some of their brand names, trademarks, private labels and contact information. The battery manufacturers are in **bold** type. Ownership, supplier contracts, branding, and contact information are subject to change, acquisition or closure.

To identify the manufacturer, ask the dealer or check the battery's Material Safety Data Sheet (MSDS). The manufacturer's code number on the battery will also identify the manufacturer. For differentiating quality, features or warranty periods, battery manufacturers will sometimes have product lines within a trademark or brand, for example, Bronze, Silver, Gold, Platinum, Titanium, Premium, Heavy Duty, Commercial, Standard, Plus, Turbo, Calcium, Classic, Maintenance Free (MF), etc. They will also contract with other manufacturers to build and private label batteries to complete their product lines, for example, specialty batteries, that are not economically feasible to build themselves. Motorcycle batteries are listed in the Powersports starting classification and motive, traction, standby, stationary, solar, and Valve Regulated Lead-Acid (VRLA) AGM and Gel Cell. Sealed Lead-Acid (SLA) batteries are classified as deep cycle batteries.

Trademarks, brand names and registrations are owned by their respective companies and are as shown below. Web addresses will often change, so please use an Internet search tool like <https://www.google.com>, <http://www.bing.com/>, <https://www.yahoo.com/>, <http://www.findownersearch.com/>, etc. to locate the most current information. Other good sources of battery manufactures are BaSyTec's [Hyperlink list](#) at

<http://www.basytec.de/> or the membership list of [Associations](#), [Business Directories](#) or [Hyperlink Lists](#) found in the [Battery References Links List](#) and [Battery Information Links List](#) at <http://www.batteryfaq.org>. Answers to Frequently Asked Questions, (FAQs) and additional information on car, powersport, truck, marine, and recreational vehicle starting and deep cycle lead-acid batteries can be found at <http://www.batteryfaq.org/>.

Tip: Use Ctrl-F to search for a manufacturer's or brand name.

For questions, errors, omissions, comments, suggestions, broken link notifications or questions, please send e-mail to wdarden@gmail.com.

LEAD-ACID BATTERY REPLACEMENT SELECTOR OR FITMENT GUIDES:

Battery Selector or Fitment Guides allow you to determine the correct replacement starting battery for your vehicle based on the vehicle manufacturer's recommended specifications, such as Cold Cranking Amps, (CCAs), Amp Hour capacity or the [BCI Group Number](#) or ETN size. A good manufacturers cross reference list for Sealed Lead-Acid (SLA) deep cycle batteries can be found on the [Battery Solutions](#) Web site.
